**1967**  
foundation

**130**  
trains per day

**530**  
employees

**6,900**  
rail platforms

**100%**  
low-noise  
wagon fleet

Partnership with  
**20**  
railway  
undertakings

## Strong organisation

Our business units specialise in different market segments. Based in Switzerland and with local teams all over Europe up to Russia and China, we ensure outstanding services for our customers:

- quick time-to-market for new connections
- strong partnerships with customers and suppliers
- future-oriented growth and investment strategy.

## Customer first

Our customers benefit from a large number of complementary services: real-time tracking & tracing, electronic data integration, codification of vehicles, technical advice for loading unit investments, transport of dangerous goods, warehouse logistics and much more.

## Dedicated terminals

Our network relies on a number of terminals that are managed or co-managed by Hupac Group companies. Enjoy the perfect service of our terminals:

- Busto Arsizio-Gallarate, Piacenza, Pordenone
- Antwerp, Singen
- Aarau, Basel, Chiasso.

## Own rolling stock

Hupac manages a fleet of 6,700 railcars with normal gauge and 200 railcars for the Russian broad gauge, offering clear advantages in terms of independency, flexibility and reliability.

- For all types of loading units: containers, swap bodies, semitrailers
- Own workshops in Busto Arsizio
- 21 main line and shunting locomotives.

## Leading in IT and digitalisation

Our IT system offers a high-performance tracking & tracing service as well as flexible data integration with our clients.

- WOLF customer platform
- Hupac Train Radar
- Ediges, XML data exchange system.

## Safety – No. 1 priority

We attribute highest importance to safety. This offers also practical advantages to our customers: well-maintained rolling stock, full compliance with loading regulations and active theft prevention ensure smooth and safe transports.

# Shuttle Net Europe

Get access to the most attractive intermodal network in Europe

## Extensive network, frequent departures

Shuttle Net is the high-performance intermodal network managed by the Swiss branch Hupac Intermodal. We connect all major economic regions of Europe and offer a high quality service to logistic service providers:

- direct terminal-to-terminal connections
- railcars for all types of loading units
- departures daily and several times per day, according to fixed timetable
- centrally located terminals to ensure optimal transport logistics.

## Reliable service

You book and deliver your loading units – we do the rest: from train scheduling to capacity management, from traffic control to event management 24/7. Our proactive teams provide reliable information in case of disruptions and take action to maintain the service.

## Megatrailers crossing the Alps

Your P400 semitrailers can easily cross the Alps by train. The Hupac Shuttle Net comprises around 100 shuttle trains per week on the 4-meter-corridors via Lötschberg and Brenner, connecting the main economic areas north and south of the Alps.

## Intermodal service on the east-west axis

Take the Shuttle Net for your shipments from Benelux and Germany to the east: we offer numerous destinations in eastern and south-eastern Europe, with onward connections to the emerging markets of Russia and Asia.

# Maritime Logistics

We deliver quality  
from port to door

## Customer driven rail solutions

ERS Railways is the Hupac Group branch for maritime inland transportation. Founded in 1994, ERS has 25 years of expertise in intermodal services for maritime containers.

## Full service for container handling

Our teams based in Hamburg and Rotterdam manage the full range of services for container handling, including rail transportation, port shunting, local delivery and customs clearance.

## Expanding network

ERS offers regular connections between the German and Dutch seaports and the most important economic centers in southern Germany. In addition, we can book your containers on the network operated by Hupac Intermodal and let you enjoy our full container handling service.

## Dedicated resources

ERS Railways is shareholder of the private railway company boxXpress. Therefore, we have access to dedicated resources such as low-noise railcars and a fleet of electric locomotives.

# Intermodal Russia

We ship your goods all over Russia with dedicated resources

## Specialist for the Russian market

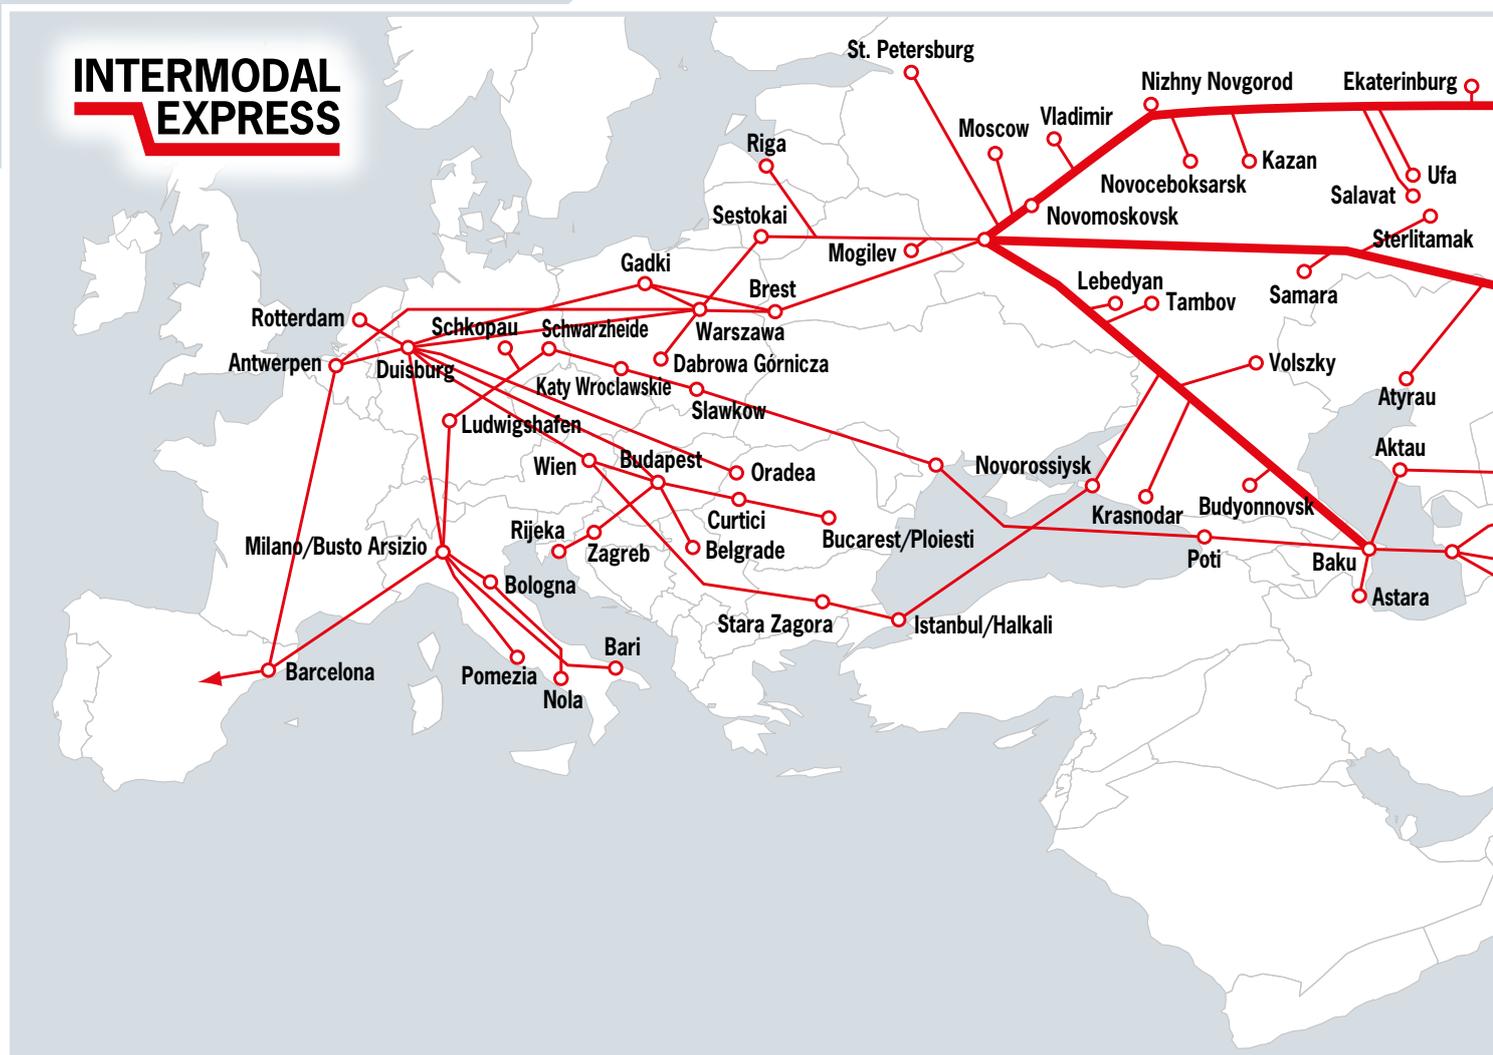

Our branch Intermodal Express specialises in intermodal transport in Russia and neighbouring countries. Russia, Georgia, Azerbaijan, Kazachstan, Mongolia, South Korea, Japan are only some of the destinations that we offer for your logistics requirements.

## We connect west Europe and Russia

Shipments between west Europe and Russia enjoy the perfect service of our regular shuttle trains. We activate different corridors for your shipments to Russia and the CIS countries: service via Sestokai (Lithuania), Malaszewicze/Brest (Belarus), Slawkow (via Ukraine), Budapest and Turkey. Our customers thus benefit from a great variety of choice and a reliable service.

## Dedicated team in Moscow

Our dedicated team in Moscow is there to assist you in all phases of transportation. We take the bookings, organise logistics, follow the train run and solve problems in case of irregularities.

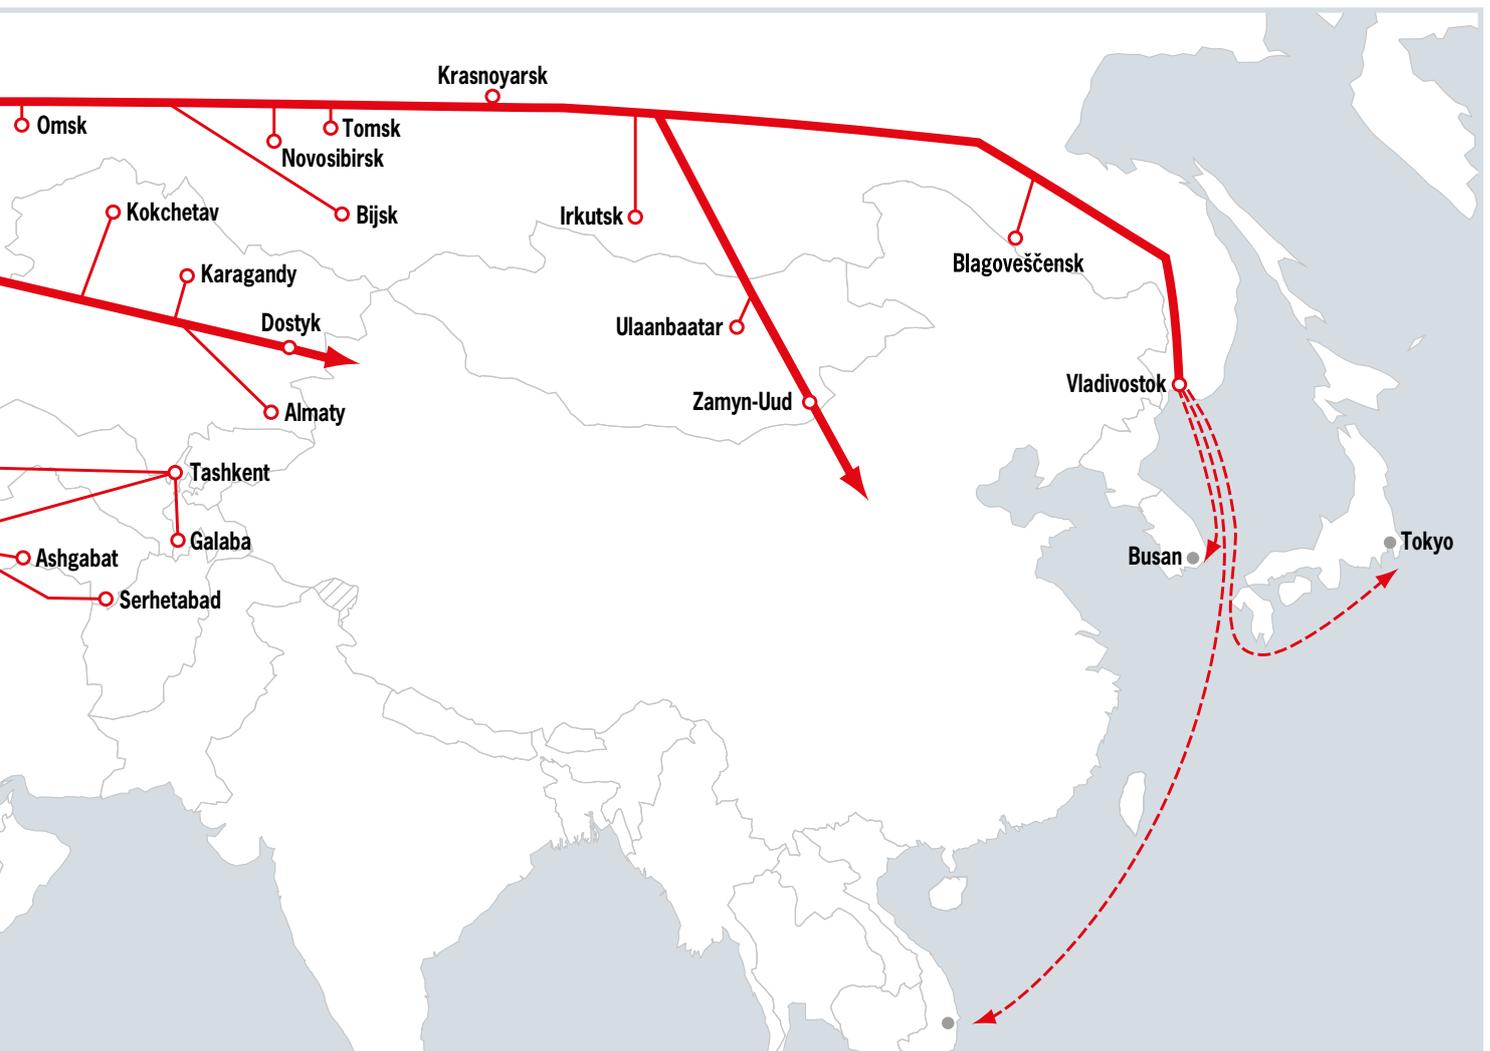

## Own wagons, reliable service

Our fleet of railcars for the Russian 1520-mm wide gauge enables quick solutions and a flexible service: a decisive advantage in today's logistic market.

## Competitive transit time

Time matters. We constantly optimise operations and administration of our connections and can therefore offer competitive transit times:

■ Antwerp - Moscow	8 days
■ Antwerp - Nizhny Novgorod	9 days
■ Antwerp - Karagandy	18 days
■ Duisburg - Moscow	8 days
■ Ludwigshafen - Moscow	9 days
■ Ludwigshafen - Baku	13 days
■ Ludwigshafen - Almaty	16 days
■ Busto Arsizio - Moscow	10 days

# Landbridge China

Take the fast line to connect Europe and China

## Connecting intermodal networks

Take advantage of Hupac's extensive network in Europe, and perfectly integrated to all major destinations in China: the best way to connect networks.

## Access to the heart of Europe

The direct train service from Malaszewicze/Brest to Duisburg takes you into the heart of the Hupac network. From here you can reach dozens of destinations all over Europe – ecofriendly by train.

## One-stop-shop

Our dedicated teams in Shanghai and Switzerland arrange all logistics services you need, such as trucking, customs service, empty container handling and depot services.

## Single container solutions

Even if it's just one single container: we help you to build up your connections between China and Europe. Competitive transit time and prices can be offered especially for shipments from/to Italy, France, Spain, south Germany and Scandinavia.

## Block train solutions

We run tailor made block trains for large transportation volumes. Get in touch with our staff for your trains between industrial areas in China and all destinations in Europe, in close cooperation with City Platforms and CRCT.

## We take you further

No boundaries for your shipments beyond China: we take you to neighbour countries like Russia, Korea, Kazakhstan, Mongolia, and offer domestic transportation services in China.

# Company Shuttle

Charter your own train  
and secure capacity  
at a competitive price

## Book your own train

The Company Shuttle unit serves customers who charter their own trains and secure capacity at an attractive price. Each company shuttle runs exclusively for up to three partners who take on the full loading commitment. Your advantages:

- customised schedules meeting your specific needs
- cost effective with fully automated standard procedures
- procurement power of a strong partner.

## We make your challenge a success

Trains are our job. We provide our know-how to ensure that your trains are an instant success. From purchasing railway services and operational control of the day-to-day business to taking action in case of disruption and wagon management – we act as an interface to the railways and free you up to focus on your core business.

## Tailor-made to satisfy highest expectations

Each train is individually arranged to meet the customer's needs. Based on the required route, schedule and frequency, we evaluate the needed components and define the required service level. For example, the package may comprise:

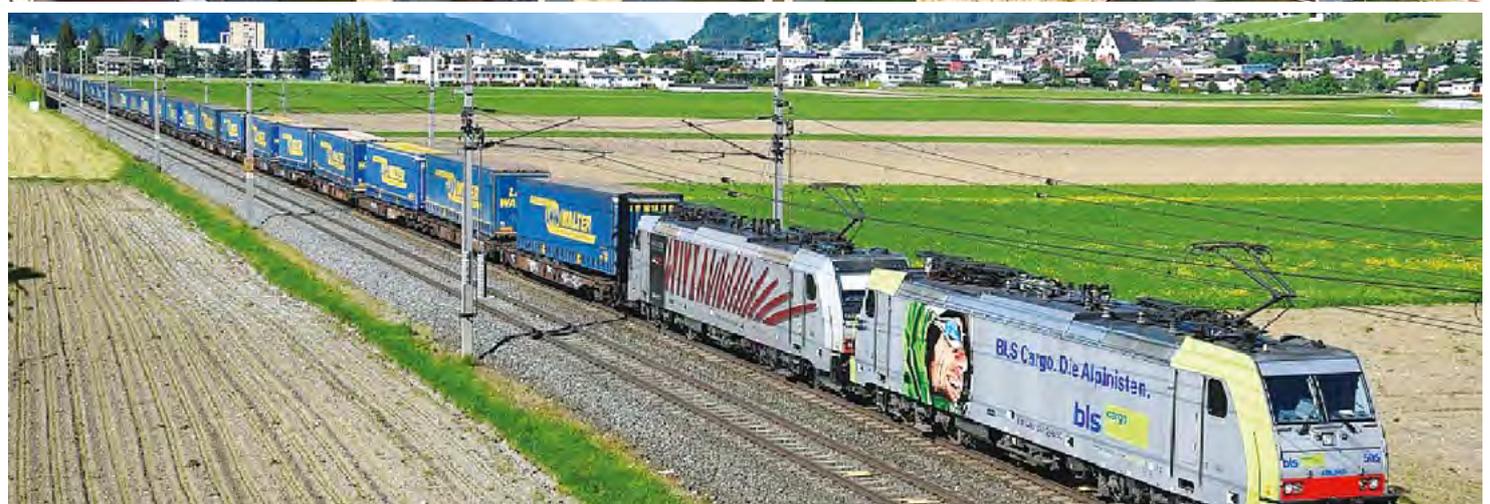

- wagon rental and fleet management
- terminal services
- train monitoring and operational control 24/7
- backup wagons or compositions
- further added value services, such as positioning of empty equipment, in-plant services, etc.

## Integrated order management

Orders are processed efficiently. We install a customised order-to-billing system for each train with effective IT integration between the customer's ERP software and Hupac's operating system.

## When do you run your first company train?

A company shuttle offers guaranteed loading capacity at an attractive price. In addition, your own intermodal train is a strong statement for ecofriendly, efficient transport solutions – a clear competitive advantage in the logistics market.
