

# Book shipments from your smartphone? With WOLF you can!

## Web Oriented Logistics Framework

Wolf – the Hupac portal – allows to manage all phases of combined transport, from booking to collection, from tracking & tracing to information on traffic irregularities along the way.

## Easy access, full service

Wolf can be accessed:

- > By any device: PC, smartphone or tablets
- > Using any browser: Chrome, Firefox, Safari, Internet Explorer, etc.

Wolf is ready for use: no initial investment required  
Wolf offers additional services such as a statistics, address book etc.

## Fast, easy shipment management with Wolf

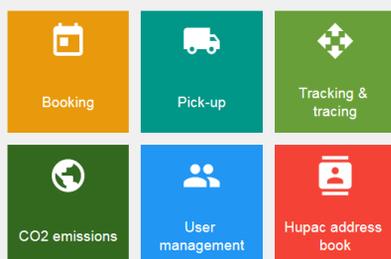

- > Define who shall access the various functions
- > Book shipments
- > Create standard forms for routine bookings
- > Access tracking & tracing tools
- > View shipments at the terminal
- > Specify driver to collect shipments in Busto
- > View shipment statistics

## Alternative booking methods?

- > Hupac promotes and supports EDI booking initiatives of customers
- > The current system Minosweb will be discontinued after 31.3.2018
- > Manual bookings via e-mail or fax will no longer be accepted after 31.3.2018

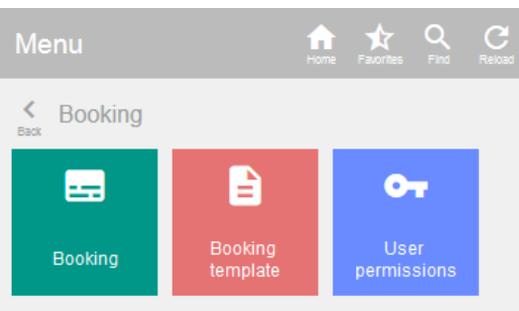

## How to get started

- > Access Wolf via <http://wolf.hupac.ch>
- > Request login and password

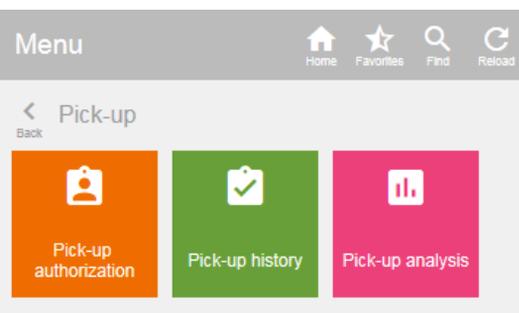

## Main menu for customers

- > Book your shipments
- > Manage the collection of shipments
- > Access the tracking tools
- > Create and manage the access of users
- > Find contacts at Hupac

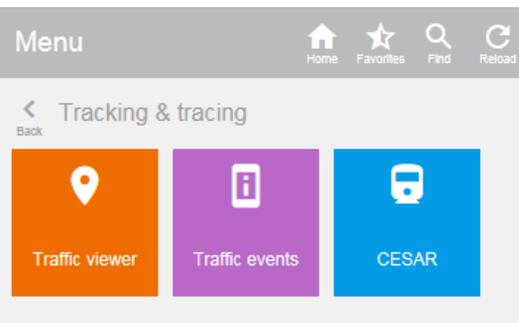

### Booking menu

- > Insert your bookings
- > View all current bookings
- > Change bookings if needed
- > Create templates for frequent bookings: quick & easy processes
- > Manage different levels of user permission: author, editor, reader etc.

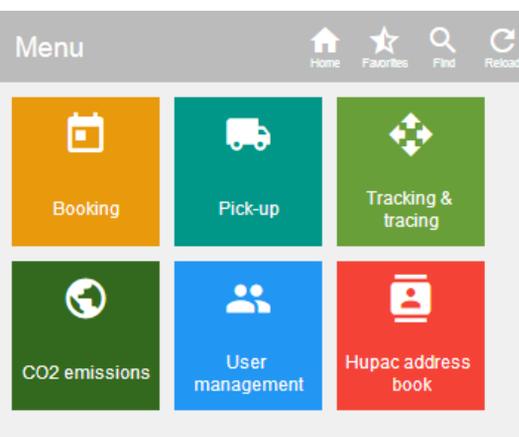

### Pick-up menu

- > View available units and define the drivers who will pick them up at the terminal (available only for Busto Terminal)
- > Get a fast overview on the status of pick-ups, with date and time of collection and name of the drivers
- > Download the voucher with the drivers' digital signature (available only for Busto Terminal)
- > Monitor how many units you have collected from European terminals and in various time ranges

### Tracking & tracing menu

- > Check the traffic status of the trains that are carrying your units: are the trains on time or delayed?
- > View the current irregularities in the network
- > Check the unit status directly in the CESAR European tracking & tracing portal

### CO<sub>2</sub> emissions menu

- > Calculate the CO<sub>2</sub> emissions of your shipments and compare with road transportation
- > Download and print your CO<sub>2</sub> certificate
