Hupac. The power of intermodal transport

Connecting intermodal networks

Take advantage of Hupac's extensive network in Europe, perfectly integrated to all major destinations in China: the best way to connect networks.

Access to the heart of Europe

Our direct train services take you into the heart of the Hupac network. From here you can reach dozens of destinations all over Europe – ecofriendly by train.

One-stop-shop

Our dedicated teams in Shanghai and Switzerland arrange all logistics services you need, such as trucking, customs service, empty container handling and depot services.

Block train solutions

We run tailor made block trains for large transportation volumes. Get in touch with our staff for your trains between industrial areas in China and all destinations in Europe, in close cooperation with the most suitable platform and CRCT.

Single container solutions

Even if it's just one single container: we help you to build up your connections between China and Europe. Competitive transit time and prices can be offered especially for shipments from/to Italy, France, Spain, south Germany and Scandinavia.

We take you further

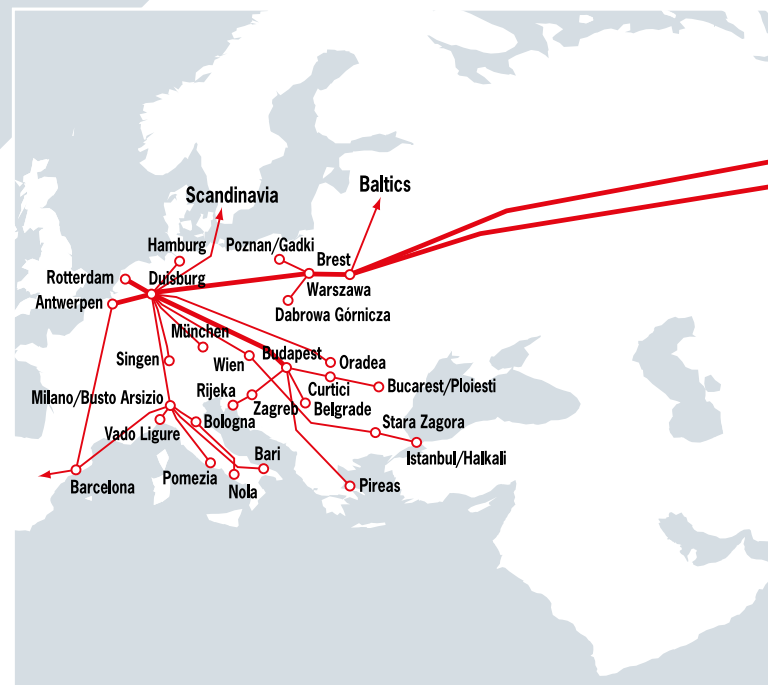

No boundaries for your shipments beyond China: we take you to neighbour countries like Russia, Korea, Kazakhstan, Mongolia, and offer domestic transportation services in China.

Own railcars

Hupac manages an own fleet of 6,900 platforms with normal gauge and 190 railcars with Russian broad gauge, offering clear advantages to the market in terms of independency, flexibility and reliability.

Dedicated terminals

Our network relies on efficient terminals which are managed or co-managed by Hupac. Main locations are Warsaw, Antwerp, Rotterdam, Duisburg, Ludwigshafen, Milan.
